

Minnesota Partners to End Hunger

State Legislative Agenda 2019

Fully fund the Good Food Access Program

The Good Food Access Program helps establish permanent facilities for the sale of healthy, affordable food in areas of the state where better access is needed. The Program provides grants, loans, and technical support for food-related enterprises such as new and improved grocery stores, mobile markets, farmers' markets, fresh food refrigeration, and other innovative community-driven solutions.

Improving school breakfast

When kids don't have breakfast available to them at school, it means they aren't ready to learn. This Legislative Session, we have a big opportunity to provide all Minnesota kids access to nutritious food to start their school day ready to learn. As a state, Minnesota has missed our opportunity to adequately support school breakfast programs in the past. This session, we propose a bold move -- to provide incentives to schools to serve high-quality school breakfast and make sure all Minnesota students start their school day ready to learn.

End school lunch shaming

Minnesota became a leader in addressing the issue of school lunch shaming when it passed legislation to ensure that reminders about lunch payments do not stigmatize or demean students who participate in the free school meals program. Yet some students who are unable to pay are still denied access to the same nutritious lunch given to other students. They are instead given a substitute meal like a cheese sandwich. We support closing the loophole in state law that allows this to happen.

Continue mobile food shelf funding

Mobile food shelf programs increase access to nutritious food for individuals who experience barriers to accessing traditional bricks-and-mortar food shelves because of transportation or mobility challenges. Mobile food shelves received \$2 million in funding from the Legislature in 2015. Support continued funding of competitive grants to create new mobile programs or expand existing programs.

Farm to School and early care

Farm to School and Early Care initiatives connect farmers and kids by serving local food in students' meals, teaching them about local agriculture in educational activities, strengthening local economies and supporting healthy eating habits. Our bill proposes creating a Farm to School Coordinator position and establishing a grant program to reimburse up to 5 cents per meal for schools and early care environments serving local food.

Urban Agriculture Grant Program

The AGRI Urban Agriculture Grant Program encourages urban youth agricultural education and urban agriculture community development in or near urban areas. Grants help organizations and communities obtain the materials and services necessary to improve access to fresh produce and successfully promote a healthy and thriving local food system.
